Your Tagz® explained

The Rear View

The bikerTagz®* website address forms an integral part of the personal tagz® company's main website and gives access to a number of services. Most importantly access may be gained to the Tagz® secure emergency database where by using authorised security codes, more detailed personal information about the wearer can be viewed by the Emergency Services.

Your own unique Tagz® Identification Number (TIN).

This number is required to access other information which may be held on the Tagz® secure emergency database. Information on this database is entered on a voluntary basis by the Tagz® wearer and is protected by a number of security levels to avoid malicious use. The Emergency Services, Medical, Fire and Police are 'Super-users' and can access this lifesaving information by entering the wearers TIN and their own unique, secure 'Super-user' access code.

Tagz® can also be used as an approved Organ Donor authorisation.
